

Eco club news.

Following our SILVER award the Eco club has continued to develop and promote lots of projects and competitions.

During last year we held another Switch off fortnight and the children are very aware of the need to save electricity where we can. We have some amazing posters around the school as reminders and the class energy monitors do a great job in making sure there are no lights left on when they are not needed. Later in the year we held an empty classroom day and the children's learning was outside the classroom to help us to be even more aware of the energy we use every day. Lessons outside were great fun.

Competitions

The Marvellous Moths competition was very well received and we had some amazing posters created. Our children are quite knowledgeable about these amazing insects now and appreciative

of our wonderful wildlife.

The decomposing quiz really surprised some of us when we found out how long certain things take to decompose. We were shocked that leather boots take up to 50 years and a plastic can rings won't decompose for 450 years. The Eco clubs assembly helped the whole school when they shared their power point.

During Switch off fortnight class 4 were our winners. I wonder who will be this year's winner when we run it in November.

Events

What a great sale we had with the Re-Love our Stuff clothing sale. The parents were so generous with some beautiful children's clothes. Lots of bargains were had by all who came and over £100 was raised to help develop the Eco Club house.

plants. Well done Eco Club for all of your careful planting and watering.

School grounds

The Flower Power Day was a great way to cheer us all up. Everyone in key stage 1 wore bright coloured clothes and brought a donation. We raised over £70 and bought some great hardy plants for the front of the school. Thank you to **Waterside Garden Centre!!** You were very generous to our school. The tyres look quite lush with the lavender and hardy

Eco Club and the summer fair

Eco club are now part of the summer fair. Following our successful Herby Planters stall the club planned and organised a recycled watering can activity. It was great fun using empty milk containers and transforming them into handy plant waterers.

2019 to 2020

The club is continuing to work on the environmental classroom. Watch this space as we are nearly there!! Very soon it will be the Eco Clubhouse for our club meetings. Just a few more tasks to complete. Keep a look out on the Eco Club notice board to find out what's currently going on.

Lots of plans and competitions to look out for!!!!
